

BE UNINFLUENCED IN ERA OF AI

We empower the community of allies to support human dignity when people should be enhanced by AI, but not influenced, and when intents of AI-enhanced persons to influence people to their own advantage should be countered. We offer decision-makers and negotiators the way to master themselves through understanding body processes behind behavior to stay uninfluenced and stop any influence on them.

Step 3. Mastering Self through Underlying Body Processes behind a Most Active System

Overcoming the negative feeling that the body evokes for a person to pursue reflex-related results

Fear

Envy

Irritation

Self-Pity

HUMAN VALUES

Step 4. Preventing Conflicts by Predicting Ways an Opponent May Wish to Influence You

Most of people influence through their perception of the world, if they try to influence you they do it by:

Evoking in you their main negative trait and feeling

Playing on objectives of their own active body system

Appealing to you through their main brain function and

Offering results linked to their main unconditioned reflex

Whatever the way of influence is, directly by AI or by people who tracked behavioral patterns by AI before communication, with our discoveries, solutions, and developments decision-makers and negotiators are free to stand it.
